Page 26 Part 17 – Function Calls Page 27 This is my first tutorial and the first lesson so please don't be rude.. This rare dissertation is committed to demonstrating the cracking and byte patching of a binary executable using IDA Pro with the intention of subverting various security constraints, as well as generating or producing the latest modified version (patched) of that specific binary.. Some people may ask why I have written this tutorial since everyone who is into cracking knows how to deal with IDA and the usual W32DASM, changing the way they are advertised.. I am trying to differentiate approach. It's 2003 now.. Page 24 Part 15 – Exports Page 25 Part 16 – Cross-references.. Due to the fact that English isn't my native language therefore may be errors.
